

City of Belton

Introduction

This case study of City of Belton is based on an August 2019 survey of SonicWall NSa firewalls customers by TechValidate, a 3rd-party research service.

“We rely on SonicWall primarily for network security, internet site filtering and SSL VPN use,” says Chris Brown, IT Director, City of Belton. “My SonicWall NSa firewall is meeting or exceeding my performance and security expectations, and provides ease of management.”

Challenges

The city used or evaluated Cisco/Meraki before selecting their SonicWall NSa firewall(s). It chose to deploy SonicWall NSa firewalls because they were challenged with consolidating security and networking features in a single solution.

Use Case

The key features and functionalities of SonicWall NSa firewalls that were important in selecting their SonicWall NSa firewall included :

- Deep Packet Inspection of Encrypted Traffic (DPI-SSL)
- An integrated VPN

Results

Brown is extremely satisfied with the NSa Series firewall.

“SonicWall NSa firewalls are easy to manage, and improve the efficiency of business processes.”
