SONICWALL NSA FIREWALLS CASE STUDY

Muebles América

Introduction

This case study of Muebles América is based on an August 2019 survey of SonicWall NSa firewalls customers by TechValidate, a 3rd-party research service.

> "Having a solution that encompasses multiple features, SonicWall becomes a complete UTM, with strong security strengths."
>
> "SonicWall is a solution that supports the entire operation of the business, including the management of all communications and adequate security levels."

Challenges

The business challenges that led the profiled company to evaluate and ultimately select SonicWall NSa firewalls:

- Used or evaluated an earlier SonicWall appliance before selecting their SonicWall NSa firewall(s).
- Deployed SonicWall NSa firewalls because they were challenged with consolidating security and networking features in a single solution.

Use Case

The key features and functionalities of SonicWall NSa firewalls that the surveyed company uses:

- Features that were important in selecting their SonicWall NSa firewall:
  - Capturing ATP multi-engine sandboxing
  - Single-pane-of-glass management and reporting (Capture Security Center)
  - Real-Time Deep Memory Inspection (RTDMI)
  - Deep Packet Inspection of Encrypted Traffic (DPI-SSL)
  - Zero-touch deployment
  - Power over Ethernet (PoE)
  - An integrated VPN
  - SD-WAN implementation

Results

The surveyed company achieved the following results with SonicWall NSa firewalls:

- Is very satisfied with their NSa Series firewall.
- Agrees that SonicWall NSa are easy to manage.
- Realized the following operational benefits following the deployment of their SonicWall NSa firewall:
  - Reduced IT infrastructure costs
  - Improved overall system uptime
  - Delivered faster performance
  - Improved data protection of critical information
- Has seen the number of blocked attacks increase by 26-50% since deploying SonicWall NSa firewalls.
