

Lakewood Ranch Town Hall

Introduction

This case study of Lakewood Ranch Town Hall is based on an August 2019 survey of SonicWall NSA firewalls customers by TechValidate, a 3rd-party research service.

“My SonicWall NSA solution provides faster, more reliable connections to our manned and unmanned gating systems,” says Mike Knauer, Network Administrator, Lakewood Ranch Town Hall. “By using them in conjunction with our NSA firewall, we have created encrypted VPN endpoints for always-on connections at our field locations.”

Challenges

The town deployed SonicWall NSA firewalls because they were challenged with easing central management of firewalls across distributed sites.

Use Case

Integrated VPN was important in selecting the SonicWall NSA firewall.

Results

Knauer is very satisfied with the NSA Series firewall and finds it easy to manage. Operationally, the solution has improved overall system uptime.

“My SonicWall NSA firewall is meeting or exceeding my performance and security expectations.”

About SonicWall

SonicWall delivers Boundless Cybersecurity for the hyper-distributed era in a work reality where everyone is remote, mobile and unsecure. SonicWall safeguards organizations mobilizing for their new business normal with seamless protection that stops the most evasive cyberattacks across boundless exposure points and increasingly remote, mobile and cloud-enabled workforces. By knowing the unknown, providing real-time visibility and enabling breakthrough economics, SonicWall closes the cybersecurity business gap for enterprises, governments and SMBs worldwide.
