SONICWALL®

Dagaz Group

Introduction

This case study of Dagaz Group is based on a May 2019 survey of SonicWall Network Security customers by TechValidate, a 3rd-party research service.

> "TZ Series firewalls are good, basic gateway security for a reasonable price," says the Chief Information Officer, Dagaz Group. "They are meeting or exceeding my performance and security expectations."

Challenges

The medium enterprise managed services provider (MSP) deployed the TZ solution to address the following operational and security challenges:

- Consolidating security and networking features in a single solution
- Malware
- Ransomware
- PDF & Office document threats

Use Case

The company has deployed TZ firewalls as the security gateway to the Internet and individual sites, and in some cases is using them for point to point VPN tunnels. In addition, they are using the Global VPN client for several sites.

The key features and functionalities that were important in selecting their TZ included:

- Reassembly-Free Deep Packet Inspection (RFDPI)
- An integrated VPN

Results

The CFO at Dagaz Group is extremely satisfied with their TZ Series firewalls and finds that SonicWall TZ firewalls are easy to deploy and manage, as well as provide the networking features they need.

The company realized the following operational benefits following the deployment of their SonicWall solution:

- Reduced IT infrastructure costs
- An improved overall system uptime
- A lowered total cost of ownership
