

Ryder System

Introduction

This case study of Ryder System is based on an August 2019 survey of SonicWall NSA firewalls customers by TechValidate, a 3rd-party research service.

“We’re using our SonicWall NSA firewalls to block unwanted traffic on the network, as well as protection on my network and servers,” says Hector Ruiz Velasco, Senior IT Architect, Ryder System, Mexico.

Challenges

The company deployed SonicWall NSA firewalls because they were challenged with providing greater scalability for network security.

Use Case

Key features that were important in selecting their SonicWall NSA firewall included:

- Capture ATP multi-engine sandboxing
- Single-pane-of-glass management and reporting (Capture Security Center)
- Real-Time Deep Memory Inspection (RTDMI)
- Deep Packet Inspection of Encrypted Traffic (DPI-SSL)
- An integrated VPN
- SD-WAN implementation

Results

Velasco is very satisfied with their NSA Series firewall and finds they are easy to manage. “My SonicWall NSA firewall is meeting or exceeding my performance and security expectations.”

Ryder achieved the following results with SonicWall NSA firewalls:

- Improved data protection of critical information
- Met regulatory compliance standards
- Increased number of blocked attacks by 51-75%

Company Profile

Company:
Ryder System

Company Size:
Fortune 500

Industry:
Automotive & Transport

About SonicWall

SonicWall delivers Boundless Cybersecurity for the hyper-distributed era in a work reality where everyone is remote, mobile and unsecure. SonicWall safeguards organizations mobilizing for their new business normal with seamless protection that stops the most evasive cyberattacks across countless exposure points and increasingly remote, mobile and cloud-enabled workforces. By knowing the unknown, providing real-time visibility and enabling breakthrough economics, SonicWall closes the cybersecurity business gap for enterprises, governments and SMBs worldwide.
