

Medium-Enterprise Architecture Company

Introduction

This case study of a medium-enterprise architecture company is based on a December 2019 survey of SonicWall Cloud App Security customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“SonicWall Cloud App Security is meeting or exceeding my performance and security expectations,” says the network administrator of this medium-enterprise architecture company.

Challenges

The organization previously had no email security in place prior to selecting SonicWall Cloud App Security (CAS).

The challenge that most influenced their decision to deploy SonicWall Cloud App Security was protection against advanced phishing attacks or business email compromise (BEC).

Use Case

Key features and functionalities of SonicWall Cloud App Security that were important in selecting SonicWall Cloud App Security included cloud-native email protection for Office 365 or Gmail.

Results

The surveyed network administrator is very satisfied with their experience using SonicWall Cloud App Security (CAS) and finds it easy to manage.

The surveyed company improved the efficiency of its threat response processes.

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:
Medium-Enterprise

Industry:
Architecture

About SonicWall Cloud App Security

SonicWall has been fighting the cybercriminal industry for over 28 years defending small and medium businesses, enterprises and government agencies worldwide. Backed by research from SonicWall Capture Labs, our award-winning, real-time breach detection and prevention solutions secure more than a million networks, and their emails, applications and data, in over 215 countries and territories. These organizations run more effectively and fear less about security.
