

AL SAFEER LOOKS TO SONICWALL FOR CYBERSECURITY AND CONTINUITY

Al Safer Group relies on SonicWall to protect their entire group's network with high-performance solutions and consolidated management

Founded in 1985 in Al Ain, Al Safer Group has successfully grown into one of the largest and most successful retail organizations in the UAE with reach in hypermarkets, malls, food outlets, real estate, furniture, manufacturing, advertising, trading and more. Al Safer operates in more than 80 multi-format stores across UAE, Oman and Qatar, employing more than 3,000 people.

Business need

Al Safer had always taken a preemptive approach to their IT Security. Nearly 15 years ago, the retailer was looking to deploy a high-performance security solution for their entire group's network that was easy-to-manage, reliable, cost effective and offered complete uptime and data protection.

Solution

Al Safer chose SonicWall as its preferred security vendor and started deploying SonicWall solutions in 2002. SonicWall's NSa firewalls have been used at the corporate headquarters in the UAE and an assortment of access points and TZ appliances deployed at its retail outlets in the countries that it operates.

Results

Zero-touch deployment of the TZ firewalls helped establish a standardized, efficient approach as the business developed and expanded in the region. SonicWall Capture Security Center's at-a-glance dashboards, remote monitoring and automation of day-to-day management tasks have freed the Al Safer IT Team from system maintenance tasks, allowing them to devote their time to solving business problems.

Benefits

- Rapid, turn-key deployment and easy management lowered the total cost of ownership.
- Single-pane-of-glass provides complete overview of the traffic and threats over the network
- Availability of Local Support

Solutions at a glance
