

REPUTED DENTAL CLINIC PROTECTS PATIENT DATA

Dubai-based Dr. Joy Dental Clinic deploys SonicWall firewall, endpoint and cloud app security

Dr. Joy Dental Clinic is a leading chain of dental clinics in Dubai, having over 5 branches spread across the city. They are renowned for using some of the most advanced and state-of-the-art dental technology in the region.

Business need

As is the case with most healthcare providers, Dr. Joy Dental Clinic deals with a large amount of personal customer data that was critical and sensitive to the establishment. Previously, the clinic used separate security solutions for firewalls, connectivity and anti-virus. These products, however, were unable to cope with advanced malware attacks and zero-day threats that was beginning to get more common and sophisticated. They needed a strong, robust IT security posture with emphasis on endpoint security and defense against advanced malware.

Solution

The clinic worked closely with SonicWall partner Looppe Design & Technology. "Their expert and diligent support staff are always willing to assist us," says Dr. Joy Antony, Founder & Managing Director. The clinic deployed SonicWall mid-range NSa Series and entry-level TZ Series firewalls for advanced network security. In addition, it added SonicWall's Capture Client for endpoint protection and Cloud App Security to protect its cloud-based email & storage.

Results

With SonicWall's suite of solutions covering endpoints, email, and network, Dr. Joy Dental Clinic has received unparalleled protection from targeted attacks, zero-day threats and ransomware along with full visibility and insight into their network. "The centralized console and ease-of-management of SonicWall solutions is truly remarkable," says Dr. Joy Antony.

Benefits

- Sophisticated, next-generation security capabilities that are extremely easy to configure, manage, and use
- Single-pane-of-glass management console provides complete overview of the traffic and threats over the network
- Availability of local partner support

Solutions at a glance

- [SonicWall NSa 2650, TZ400](#)
