

SONICWALL PRODUCT LINE: AT-A-GLANCE

Next-Generation Firewalls High End: NSsp 15700

Multi-instance firewall designed for large distributed enterprises, data centers and MSPs, offering high-speed protection, high port density and true tenant isolation with Unified Policy

Mid-Range: NSa Series NSa 9650/9450/9250/ 6650/5650/4650/3650/2650

Industry-validated security effectiveness and performance for mid-sized networks, branch offices and distributed enterprises

Entry Level: TZ Series TZ670/TZ570/TZ400/TZ350

Integrated threat prevention and SD-WAN platform for small/medium organizations and SD-Branch deployments

Virtual: NSv Series

Virtual firewalls with flexible licensing models to shield all critical components of your public and private cloud infrastructure

Wireless Security SonicWave Series SonicWave 432e/432i/432o/ 231c/224w/231o

Security and performance built for the next wave of wireless devices, managed through the cloud or firewall

Secure Mobile Access SMA Series SMA 8200v/7210/ 6210/500v/410/210

Simple, policy enforced secure access to network and cloud resources

Access Switch SWS12-8/SWS12-8POE/SWS12-10FPOE/ SWS14-24/SWS14-24FPOE/SWS14-48/ SWS14-48FPOE

Delivers intelligent switching for next-generation secure connectivity of SMB and SD-Branch deployments.

Email Security Series ESA 9000/7000/5000/ VM Software/Cloud Service

A multi-layered solution that protects against advanced email threats

Management & Analytics
Capture Security Center
Global Management System (GMS)
Network Security Manager
Control and knowledge of your network is power

Capture Security appliance (CSa)
On-premise file testing and malware prevention.

Capture Client
A unified client platform that delivers multiple endpoint protection capabilities, including advanced malware protection, sandboxing, Application Vulnerability Intelligence, and roll back in case of infection

Cloud App Security
A CASB solution that delivers next-gen security for SaaS applications, such as Office 365 and G Suite, to protect email, data and user credentials from advanced threats while achieving compliance in the cloud

Next-Gen Firewall Subscription Services Essential Protection Services Suite

provides all essential security services needed to protect against known & unknown threats. This includes Capture Advanced Threat Protection with RTDMI Technology, Gateway Anti-Virus, Intrusion Prevention and Application Control, Content Filtering Service, Comprehensive Anti-Spam Service, Network Visibility and 24x7 Support.

Advanced Gateway Security Suite (AGSS) is available as an add-on service for all physical and virtual SonicWall firewalls, to protect against the most advanced and unknown threats.

Included in Advanced Gateway Security Suite (AGSS); Combined with Next-Gen Firewall in TotalSecure Advanced Edition

- Capture Advanced Threat Protection (ATP) multi-engine cloud-based sandboxing
- Gateway Anti-virus and Anti-spyware
- Intrusion Prevention Service
- Application Control
- Content/Web Filtering Service
- 24x7 Support

Security-as-a-Service (SECaaS)

Outsource your network security with our turnkey solution

Qualifying Questions

Next-Gen Firewalls

- Can you keep up with the increase in bandwidth resulting in multi-gigabit performance needs?
- Is your current Firewall able to perform threat inspection at the rate of incoming threats?
- What are your performance requirements criteria?
- Total number of users/networks behind the firewall?
- Total number of sessions/connections at peak?
- How many remote sites and users will be connecting to the firewall?
- How do you measure the effectiveness of your security controls?
- What type of internet connection do you have? What is the speed?
- What are you doing to protect against new threats like zero-day attacks?
- Can your sandbox detect and block threats hidden in deep memory?
- How many engines does your sandbox incorporate?
- Can your sandbox hold the files at the gateway before being released?
- Do you know whether or not your organization's firewall is inspecting HTTPS traffic?
- Have you had network service disruptions or downtime due to inspecting HTTPS traffic?
- Is your virtual firewall as robust as your physical firewall?
- How are you securing your public or private cloud environments?
- Are you able to implement proper security zoning and micro-segmentation on your virtual network?
- Do you have complete visibility and control of your virtual traffic?
- Would you be interested in reducing costs by replacing MPLS with SD-WAN for secure private networking?

Capture Client

- Do your endpoints need consistent advanced protection against ransomware and encrypted threats?
- How easily can you enforce policy compliance and license management across all endpoints?
- Do you struggle with the visibility of endpoints and management of your security posture?
- Does your endpoint security product connect to a sandbox environment?
- Can you catalog the applications installed on endpoints and know how many vulnerabilities are contained within them?
- Does your current solution continuously monitor your system's health?
- Can you roll back the damage caused by ransomware to a previously known clean state?
- Do you have the ability to block unknown and potentially infected devices from connecting with endpoints?

Cloud App Security

- Do you use O365 or G Suite?
- Are you using Proofpoint or Mimecast to secure O365/G Suite?
- Are you scanning internal O365 email?
- How many sanctioned SaaS apps is your organization using?
- Do you struggle with enforcing compliance for data stored in SaaS applications?
- How will you know if your users' credentials are compromised?
- Do you have visibility into who is accessing the data, from where, and when? (BYOD)

Inspect Deep Memory

A patent-pending technology, the SonicWall Real-Time Deep Memory Inspection (RTDMI™) engine proactively detects and blocks unknown mass-market malware via deep memory inspection in real time. Available now with the SonicWall Capture Advanced Threat Protection (ATP) cloud sandbox service, the engine identifies and mitigates even the most insidious modern threats, including future Meltdown exploits.

Wireless Security

- Are your employees/partners/customers complaining about slow Wi-Fi performance?
- What would be the maximum number of wireless users at any one time?
- Do you have concerns about the cost of adding a secure wireless solution into your network?
- How familiar are you with the 802.11ac Wave 2 wireless standard?
- Do you need flexibility to manage access points - cloud vs firewall management?
- Have you planned your WiFi network effectively?
- Would you need APs to be untethered from firewalls?
- Do you worry about providing advanced security functionalities on your WiFi network?
- Are guest services important to you?
- Would you require customized guest login portal for guest onboarding?

Access Switch

- Do you need gigabit-capable access switches to power PoE-enabled devices?
- Is a unified security posture with unified visibility and management important to you?
- Are you facing solution challenges with 3rd party switches that work with SonicWall ecosystem?

Secure Mobile Access

- What is your current remote workforce access strategy?
- What are your thoughts about employing a zero-trust network access approach?
- How are you providing users secure access to company resources and applications hosted on-prem and cloud?
- Do you have visibility into every users and device that is accessing your network?
- How are you currently protecting your business-critical web properties and web servers?

Email Security

- Are you concerned about advanced email threats such as ransomware, spear-phishing and Business Email Compromise?
- Does your current email security solution provide Advanced Threat Protection capabilities?
- Are you concerned that emails containing confidential information might be leaked?
- How do you comply with regulations such as GDPR, Sarbanes-Oxley, GLBA or HIPAA?
- Are you interested in offering managed email security services to your clients? (MSSPs)

Management & Analytics

- What problems could you solve by unifying your security solutions under one common management platform with a single-pane of glass experience?
- What economic and operational challenges are you experiencing from managing your security infrastructure?
- How confident are you of your ability to demonstrate cyber-security compliance such PCI, HIPPA and GDPR?
- How would it change your security posture if you were able to better detect and respond to threats and risks with speed and accuracy?
- What value would you and your leadership team gain from full visibility into cyber threats and risks to your business?
