

Wild Horses 4x4

Introduction

This case study of Wild Horses 4x4 is based on a July 2020 survey of SonicWall Capture Client customers by TechValidate, a 3rd-party research service.

“Great software. We use Capture Client for all end users. Capture Client has detected many threats and blocked them. It has been great for us.”

Challenges

The small business automotive and transport company was challenged by having to manage multiple clients for their endpoint security needs.

The company had evaluated a McAfee solution before selection SonicWall Capture Client.

Use Case

The company selected Capture Client to protect their endpoints for its tight integration with their SonicWall security ecosystem.

When compared with other endpoint security products, Jefferson found Capture Client significantly better in:

- Ease of deployment and roll-out
- Next-gen antivirus
- Endpoint detection & response
- Application vulnerability intelligence
- Firewall integration
- Management & reporting

Results

The company reports they achieved the following results with SonicWall Capture Client:

- Improved the efficiency of threat response processes
- Reduced the time to respond to malware attacks
- Improved end-user productivity

Jefferson strongly agrees that:

- They found it very easy to request and get access to a Capture Client trial
- they got all the information about Capture Client that they needed to make their decision
- They could easily compare Capture Client with competitive solutions
- They didn't need any training to get Capture Client setup and rolled out
- Capture Client's documentation and KB articles were helpful in doing their job
- They are happy with the technical support they get for Capture Client from SonicWall

Company Profile

Company:
Wild Horses 4x4

Company Size:
Small Business
