

CONNEX CUTS COSTS WITH FLEXIBLE, RELIABLE SONICWALL MOBILITY SOLUTION

By deploying SonicWall platform, Connex Credit Union to save \$40K annually

Business need

“We needed to a simplified way for employees to work remotely,” says Michael Giorgio, Director of IT. Connex required a comprehensive and secure remote access solution that could decontaminate remote traffic before it could enter the network. Previously, it had deployed a Check Point® firewall, but that had frequently dropped internet connectivity for hours.

Solution

Connex considered Cisco® and Barracuda® solutions before choosing SonicWall Secure Mobile Access (SMA), SonicWall Email Security and a SonicWall NSA Series firewall.

Results

Connex has lowered operating costs, increased flexibility and gained greater reliability. “Our mobile users can reliably access their email and file shares remotely as if they were still on the network. As an added benefit, we get fewer related help desk requests,” says Giorgio. “SonicWall keeps us secure from threats. The NSA lets us automatically failover to a DSL backup immediately if our primary connection drops.”

Benefits

- Decrypts and decontaminates VPN traffic before it enters the network
- Enforces VPN authentication, data encryption and granular access policy
- Verifies outbound traffic in real-time
- Enables secure business continuity
