

RETAILER GROWS BUSINESS WITH SONICWALL

Schewels upgrades network and email security while cutting costs, spurring productivity

Business need

The company needed a consolidated platform that ensured reliability and scalability, while minimizing impact on limited IT resources.

Solution

Schewels deployed SonicWall NSA Series firewalls, Email Security and Global Management System (GMS). “We needed the most reliable hardware, advanced services, and user-friendly interfaces. We found all of that in SonicWall,” says Jon DeCarmo, Manager of IS. “It is the best dollar-for-dollar value versus its closest competitor.”

Results

“SonicWall gave us the same level of quality, security and uptime as Cisco, but the user interface is so much friendlier,” says DeCarmo. “SonicWall is progressive in their design and vision. The granular reporting helps us increase user productivity. From an operations standpoint, SonicWall has got to be the best solution out there. From a manageability standpoint, it has given us peace of mind.”

Benefits

- Eased IT overhead while enabling business growth
- Increased user productivity
- Boosted security and reliability while lowering costs
