

NCC Secures Network Infrastructure and Remote Access with SonicWall

Distributed enterprise connects over 5000 employees to critical business applications using next-generation firewalls and cutting-edge security solutions

Business need

NCC was in the market for security solutions, which allowed users from remote locations to securely access specialised enterprise applications. The group needed scalable, reliable and user-friendly solutions that would provide comprehensive visibility into and protection from potential threats.

Solution

To protect its network against a wide spectrum of threats in an efficient manner, NCC's IT team opted for SonicWall's high-performance next-generation firewalls, including solutions from the SonicWall SuperMassive 9000 Series and the TZ Series, as well as the Global Management Systems (GMS) tool to oversee security in a centralised manner.

Benefits

- Enterprise-grade protection
- Secure access to critical business applications
- Scalable and reliable comprehensive network security
- Employee access based on centralised policies and clearance levels

Solutions at a glance

- Next Generation Firewalls
- Management & Reporting
