

# SonicWall takes on the latest cyberattacks to protect your network.

YOU CAN'T PROTECT YOURSELF FROM WHAT YOU DON'T KNOW ARE THREATS.

The bad guys really are out to get you.

## 80%

of responders were victims of cyberattacks.<sup>1</sup>

You can't stop what your firewall can't see.

## 62% 41%

or more of all web connections are encrypted.<sup>2</sup>

of cyberattacks are hidden by encryption.<sup>1</sup>

The legacy firewall services can't effectively stop unknown threats.

## 60%

or more will miss unknown threats hidden by encryption.<sup>3</sup>

MAKE SURE YOUR SONICWALL FIREWALL IS GIVING YOU THE FULLEST PROTECTION AVAILABLE.

SonicWall firewall services block trillions of cyberattacks on our customers' networks.

### SonicWall Firewall Services

block revealed malware, botnets and data leaks.

SonicWall DPI-SSL lets your firewall see – and stop – hidden attacks.

### SonicWall DPI-SSL

unlocks encryption to reveal malicious traffic, with minimal latency.

SonicWall Capture ATP will typically detect and stop 30 new forms of malicious attacks for the average customer each year.

### SonicWall Capture ATP

cloud-based, multi-engine sandbox identifies and blocks unknown zero-day attacks.

CONTACT YOUR SONICWALL PARTNER OR SALES TEAM TO BEAT THE LATEST ATTACKS.
